821 formations held a deep fascination for them. I understood but little of it, for their Spanish was too broken, and I was unfamiliar with Yaruro. So we spent the evening in quiet conversation and amity, conscious of the soft voices of the women in the background, children, laughter, and always the throbbing roar of the distant bands of 825 howlers which was brought to us by the wind. To the Yaruros the howlers were formerly men.

Landaeta relayed to me questions uppermost in his wife's mind. Did I have a wife in my own country? Did I have any children? Why had they not come with me? Once in Brazil I had been asked similar questions by another naked primitive fold, and I had answered truthfully that I had neither wife nor children. I remember their confusion and amazement. In their eyes I was a great man, and therefore I should have had many wives and many children. It is certain that they really never believed or understood my answer. So, in this case, not wanting to make extensive explanations about our civilization, which not only does not insist that men and women marry, but even makes it very difficult for them to do so, I lied, answering that I was married and had one son. Of course I had to describe both wife and boy to the inquisitive women. They wanted to know if her skin was the same color as mine, and her hair as white as mine, and what did she wear on her body? Also, they made me 784 promise that some day I would bring my wife and boy to them, so that the women who, because of social taboos, could not converse directly with me, would be able to do so with my wife.

821 As we talked of these things, falling stars played in the heavens, "messengers of Kuma" according to the Yaruros, the big dipper swung higher, and the southern crosses began their journeys. For a while the wind died down, and the monkeys were heard no more. Always responsive to the world in which they live, the Yaruros became silent and still. And then, as the moon rose above the hills of Guiana, Landaeta disappeared in the darkness to return later and begin his singing.

796 Unlike our own religious ceremonies, there was no attempt at creating artificial seriousness. The children played about noisily under 781 the very nose of the shaman without reproof, and the adults talked happily. The imminent communion with the gods was an event of festive proportions and no restraints were put on normal and natural behavior before joyous events.

533 There was no dancing on this night, in deference to me, for I could not participate in it, but we sat in a semicircle and sang after the shaman.

787 Itciai arrived and I was helped to sit close to the shaman. Apparently Itciai was talking about me, referred to as "the Man." I lighted 791 a cigarette and held it to the shaman's mouth. Without interrup-

609 Yawalapiti village in Brazil; but the very silence was expressive of the mutual sorrow at our parting. Landaeta loaded me and my baggage in a canoe and we drifted slowly away, leaving on the vast beach a few human beings alone in a strange world, but not lonesome, since they live with their gods.

Economic Life

231 The Yaruros practice no agriculture and keep no domestic animals except the dog, even though they inhabit country over which roam wild horses and cattle, and they come in contact with the "llaneros," who are typically pastoral. Therefore, their daily dinner is dependent upon, and determined by, indigenous environment and their own
262 energy. The quality and abundance of their food supply depends upon seasonal variations of climate. A period of drought or a too prolonged period of rain may cause famine. They would be allowed a degree of freedom from the daily task of acquiring dinner were they able to store any food for future use. The tropics, however, offer special difficulties to this which are not present in more temperate climates. Their knowledge of what is edible in various localities, where to find it, how to gather it, and how to keep it and what is available at different times of the year are all factors important to the satisfaction of their most fundamental need. Technical knowledge in the making of tools and methods of hunting and fishing are also important.

262 As if not satisfied by the degree of their dependency on it, and
784 on their technical knowledge, primitives often self-impose other limitations. There may be an abundance of a particular animal which could be hunted easily or a particular plant which could be gathered in quantity, yet the primitives very often raise barriers against such practices. The fact that they have religious and perhaps magical reasons for such attitudes explains but does not change the situation. Thus, for instance, among them deer may be plentiful in a region, the people may be starving, and yet no deer is killed and eaten.[6]

177 Limitations such as these are not entirely imposed by nature and by the culture of the people; often, the proximity and the attitude of other groups of mankind play their part. A weak tribe will be restricted in its lands over which it may wander, hunt, and claim ownership, and very often may be reduced to seeking a less desirable environment where food is even scarcer. Or a new people may seize its lands and they will be prohibited even from hunting on these lands. Or there may be an influx of peoples who will live partially on the hunt also, though their main source of food may be agricultural.

[6] The peoples of the Kuluene river, Matto Grosso, Brazil, will not hunt nor eat deer.
